Education

La Salle University Chihuahua

B.E. in Information Technologies and Telecommunications

Chihuahua, Mexico — 2022 – Current

Expected Winter 2026

Experience

IT Intern

2025

Figeac Aero

Chihuahua, Mexico

- Developed and deployed **Tooling Manager**, a web application that centralized tooling and part information previously distributed across multiple Excel files.
- Designed and implemented a **MySQL database** and migrated existing Excel data into a structured relational system while validating data consistency and relationships.
- Developed the application using **PHP**, including user authentication and role-based access control to separate administrative and standard user capabilities.
- Deployed the application on the company's internal web server, gaining hands-on experience with enterprise server infrastructure and application deployment.
- Provided **Helpdesk and IT support**, troubleshooting hardware, software, permissions, configuration issues, and employee requests across different areas of the organization.
- Supported IT operations through equipment provisioning and decommissioning, Windows Server administration, device operating system updates, printer maintenance, and server-room maintenance.
- Modified and maintained **Excel VBA macros** to troubleshoot and automate repetitive tasks for company users.

AI Training Assistant

Jan 2025 – Mar 2025

Outlier

Chihuahua, Mexico

- Supported the training of AI models in English and Spanish by generating, evaluating, and reviewing prompts to improve language understanding and response quality.
- Created and curated training data while maintaining labeling accuracy, consistency, and adherence to project-specific guidelines.
- Collaborated within a distributed workflow to review model outputs and identify issues in AI-generated responses.

Projects

Apollo Server GraphQL REST API | *Node.js, Apollo Server, GraphQL, MySQL*

May 2025

- Designed and implemented a relational MySQL database based on a logical schema, including entity and junction tables with foreign key constraints.
- Developed a Node.js backend using Apollo Server and Express to expose database operations through a GraphQL API with type definitions and resolvers.
- Implemented GraphQL queries and mutations supporting CRUD operations across core and junction tables.
- Used environment variables and **dotenv** for configuration management and database connectivity.

Gym Routine Mobile App | *Kotlin, Android Studio, Jetpack Compose*

Apr 2025

- Developed a mobile application in Kotlin using Jetpack Compose for users to view and follow structured workout routines.
- Implemented screen navigation, state management, and responsive declarative UI components across multiple application screens.
- Designed the interface with a focus on usability, accessibility, and straightforward navigation.

Technical Skills

Languages: Python, JavaScript, Kotlin, PHP, SQL, HTML/CSS, VBA

Frameworks/Technologies: React, React Native, Node.js, Express, Apollo Server, GraphQL, Jetpack Compose

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, VS Code, Android Studio, Docker, MySQL Workbench

Systems: Linux (Ubuntu, Kali), Windows Server

Relevant Coursework

- Object-Oriented Programming
- Cybersecurity
- Algorithms

- Operating Systems
- Artificial Intelligence
- Database Systems

- Computer Networks
- Software Engineering
- Probability and Statistics

Certifications

C1 English Certification (CEFR)

June 2021

British Council / APTIS General

Mexico

- Achieved a C1 English proficiency level according to the Common European Framework of Reference (CEFR).

Technical High School Diploma in Programming

Aug 2019 – Jun 2022

CBTis 122

Chihuahua, Mexico
